SUMMARY

Backend Engineer specializing in AI-powered systems and Retrieval-Augmented Generation (RAG), with hands-on experience building intelligent applications that integrate large language models with scalable backend architectures.

EDUCATION

Government College University

Hyderabad, Sindh

B.S in Computer Science

January 2025

- **GPA:** 3.42/4.00
- **Related Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database System, Computer Networks, Software Engineering, Artificial Intelligence, Machine Learning, Probability & Statistics.

EXPERIENCE

Ali Programmers Lahore, Pakistan

Lahore Pakistan

Backend Python Developer (RAG & Intelligent Systems)

March 2025 – Present

- Developed core backend systems using Python, focusing on Retrieval-Augmented Generation (RAG) architectures.
- Designed intelligent systems similar to Generative Conversational Models (GCM), integrating large language models with real-time data retrieval.

Aptech Defence

Hyderabad Pakistan

Artificial Intelligence Instructor

Sep 2025 – March 2025

- Designed and delivered hands-on instruction in Artificial Intelligence, Machine Learning, and Deep Learning, covering model training, evaluation, and deployment workflows.
- Guided students through practical implementations using Python, NumPy, Pandas, scikit-learn, TensorFlow/PyTorch, and real-world datasets.

Gexton Education

Hyderabad Pakistan

Python Instructor

May 2023 – Aug 2023

- Conducted structured Python training sessions focusing on core programming concepts, data structures, and algorithmic problem solving.
- Designed and supervised hands-on Python projects to help students apply concepts through coding exercises.

PROJECTS

Self-Driving-Car (FYP)

Tech Stack: Tensorflow, Opencv, Raspberrypi

- Developed a **self-driving car prototype using neural networks (TensorFlow)** for decision-making and autonomous control, with **Raspberry Pi acting as the central processing unit (vehicle brain)**.
- Implemented **real-time image processing using OpenCV** for lane detection, obstacle recognition, and environment perception from camera input.

Facial Expression Recognition Using CNN

Tech Stack:

- Built a **Facial Expression Recognition system** using a **Convolutional Neural Network (CNN)** on the Kaggle dataset, achieving robust classification of multiple emotion categories.
- Performed **image preprocessing, augmentation, model training, and evaluation** with TensorFlow/Keras to optimize accuracy and generalization.

Advanced E-Commerce RestAPI

Tech Stack: Django, Django REST Framework, Bootstrap

- Developed a complete Ecommerce REST API in Django/Django REST Framework with modules for authentication, products, categories, cart, orders, and payments.

- Implemented custom authentication, cart management, checkout flow, order tracking, and CRUD endpoints with proper validations and permissions.

Advanced E-Commerce Website

Tech Stack: Django, PostgreSQL, Token-Based Authentication, Bootstrap

- Built a complete backend system for a full-featured e-commerce platform.
- Implemented user authentication, product management, cart and order processing, admin dashboard, and product variation selection (size, color, etc.)

Django Multi-Author Blog with RBAC & AI-Powered Moderation

Tech Stack: Django, PostgreSQL, Gemini API, Django Templates

- *Developed a multi-author blogging platform with role-based access control (Admin, Author, Reader), email-verified authentication, and an approval workflow for posts.*
- Integrated AI-powered comment moderation using Gemini API to automatically filter abusive, hateful, or unsafe content, ensuring a safe user experience.

SKILLS

Programming & Backend: Python, Django, REST API, PostgreSQL, MongoDB, JavaScript

Frontend & Mobile: Dart, Flutter, HTML, CSS

Machine Learning & AI: Machine Learning, Deep Learning, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG)

Data & Analysis: Pandas, NumPy, Matplotlib

Tools & DevOps: Git, Docker, CI/CD (GitHub Actions/Jenkins), Jupyter Notebooks, VS Code, PyCharm, Android Studio, Google Colab

Achievements

- **Second Position** in **Final Year Project (FYP) Exhibition** at the university for an AI-based project, evaluated by academic and industry panels.
- **First Position** in the **2nd Computer Science Project Exhibition at GC University Hyderabad**, competing among multiple undergraduate projects.
- **Research Paper Presenter** at an international conference:
“Skin Cancer Detection Using Convolutional Neural Network” presented at **ICRMASD: BIA – GC University Hyderabad**.
- Achieved **586+ forks on Kaggle**, reflecting strong community engagement and recognition for machine learning and deep learning projects.
